NANETS Call for Abstracts, 2020

The North American Neuroendocrine Tumor Society (NANETS) is pleased to announce that **abstracts are now being accepted for the NANETS 2020 Multidisciplinary NET Disease Symposium, October 1-3 in Montreal, Quebec, Canada.**

NANETS is committed to furthering neuroendocrine tumor disease diagnosis, treatment and management through research and education. With over 15,000 new patients diagnosed with NETs each year, there is a continuing need to support NET research and advance the dissemination of vital research findings.

NANETS' Annual Multidisciplinary NET Medical Symposium represents an excellent opportunity to present research relevant to cutting edge topics in neuroendocrine tumor research. Medical researchers at institutions in North America and around the world are invited to submit abstracts.

NANETS encourages abstract reporting on recent NET research and/or describing ongoing or current clinical trials with the intent of increasing awareness of these studies. Investigators may submit abstracts that have been presented at other scientific meetings and/or published in scientific journals since October 1, 2019.

Abstracts are reviewed and scored by NANETS' Scientific Review & Research Committee of NET medical research experts, and selected to be shown in poster sessions or as oral abstract presentations at the NANETS 2020 Multidisciplinary NET Disease Symposium. Ten to twelve oral abstracts will be selected for presentation in two education sessions at Symposium.

Accepted categories are as follows. Note that case reports are not accepted.

1. Basic Science
2. Applied Basic Science
3. Chemo/SSA/Biologics (Clinical)
4. Nuclear Medicine/Interventional Radiology/Imaging (Clinical)
5. Surgical/Applied Pathology (Clinical)
6. Population Science
7. Other
8. Trials in Progress

Abstracts are published in a comprehensive guide featuring the latest in NET research, archived on NANETS' website, as well as a large number being published in the medical journal *Pancreas*.

Important dates to remember:

> 2/11/2020: Open call for abstracts
> 6/12/2020: Close abstract submissions
> On or about 7/10/2020: Abstract notifications sent
> **7/17/2020: Last day for authors to confirm their oral/poster presentations.**

The abstract submission process is managed through CTI abstract management at the following website: https://cpaper-us.ctimeetingtech.com/nanets_2020/login. You will be asked to create a new account to submit your abstract (previous years' usernames and passwords will not work). You can edit your submissions any time before the June 12 deadline by logging into your account.

For more detailed information on abstract submission requirements, see the Abstracts page of the NANETS website. Please contact NANETS headquarters with any questions at staff@nanets.net.

Sincerely,

Dawn Quelle, PhD
